SKILLS

Web Development & Software

- HTML5 & CSS3
- JavaScript
- Responsive Web Design
- UI/UX Design
- E-commerce Website Development
- Website Troubleshooting & Debugging
- JSON & Local Storage
- Basic PHP
- Java Programming
- SQL & Database Fundamentals
- Programming & Computational Thinking
- Git & GitHub
- AI-Assisted Development

IT & Technical Support

- Hardware & Software Troubleshooting
- Desktop, Laptop & Peripheral Support
- Software Installation, Configuration & Updates
- Basic Network Troubleshooting
- Basic Router & Switch Configuration
- User Account & Password Support
- Hardware Setup & Deployment
- Data Backup & Recovery
- Helpdesk & End-User Support

PROFESSIONAL PROFILE

IT professional and aspiring web developer with several years of practical experience in IT support, technical troubleshooting and technology environments. Currently completing a BSc in Information Technology, with a growing focus on web development, programming and modern digital technologies.

I have practical experience designing and developing websites using HTML, CSS and JavaScript, including building an e-commerce website for my own business, J&R Precision Prints. I have also developed a JavaScript productivity application and updated and redesigned a real-world school website, giving me experience applying development and design skills to practical projects.

My background as an IT Specialist and Coding & Robotics educator has strengthened my technical problem-solving, analytical thinking, communication and ability to learn new technologies independently. I am seeking remote opportunities in **Junior Web Development, Front-End Development, Junior Software Development, Web Design/Development and IT Support**, where I can contribute my existing technical experience while continuing to grow as a developer.

Professional Experience

January 2020 – December 2022

IT Specialist

Da Silva Academy Primary School · Rustenburg, North West

- Provided technical support and troubleshooting for desktops, laptops, printers and other IT peripherals.
- Diagnosed and resolved hardware, software and connectivity issues for staff and students.
- Installed, configured and updated software and provided technical assistance to users.
- Supported wired and wireless network connectivity and performed basic network troubleshooting.
- Assisted with hardware upgrades, equipment deployment and the setup of computer and network systems.
- Provided in-person and remote technical support to users with varying levels of technical knowledge.
- Assisted with data backup and recovery procedures and maintained accurate IT records.
- Supported IT upgrades, deployments and general technology projects.

Coding, Robotics & Technology

- Coding & Robotics
- Scratch / ScratchJr
- MakeCode & micro:bit
- EdScratch & EdBlocks
- Educational Technology

SELECTED DEVELOPMENT PROJECTS

J&R Precision Prints — E-commerce Website

Designer & Developer

- Designed and developed a responsive e-commerce website from concept through implementation.
- Built a product catalogue, categories, product pages and shopping-cart functionality.
- Used JavaScript, JSON and local storage to manage interactive features and product data.
- Designed the user interface, branding and responsive layouts for desktop and mobile users.
- Tested and debugged functionality while using AI-assisted development tools to support problem-solving and development.

TaskFlow — JavaScript Productivity Application

Developer

- Designed and developed a responsive productivity application using HTML, CSS and JavaScript.
- Implemented functionality allowing users to create, edit, search, filter and organise tasks.
- Used local storage to persist application data within the browser.
- Implemented CRUD functionality and interactive user interface components.
- Tested and debugged application functionality across different interactions and screen sizes.

February 2023 – December 2024

IT Specialist at *Kloof View Primary School*,

Rustenburg, North West

- Provided day-to-day technical support for hardware, software and basic network-related issues.
- Diagnosed and resolved problems involving computers, laptops, peripherals and other IT equipment.
- Installed, configured and updated software applications and assisted users with software-related queries.
- Supported user account management, password resets and login-related issues.
- Troubleshoot wired and wireless network connectivity and assisted with basic network configuration.
- Assisted with the setup and configuration of routers, switches and other network equipment.
- Supported computer deployments, hardware maintenance, data backup and recovery.
- Maintained documentation relating to IT systems, procedures and troubleshooting processes.

January 2025 – Present

IT Specialist at *Selly Park Convent Primary School*,

Rustenburg, North West

- Provide day-to-day technical support to staff and students with hardware, software and general IT-related issues.
- Diagnose and troubleshoot problems involving computers, laptops, peripherals and other technology equipment.
- Assist with software installation, configuration, updates and basic software troubleshooting.
- Provide user support for login, password and account-related issues.
- Assist with the setup, preparation and deployment of computers and other IT equipment.
- Troubleshoot basic wired and wireless connectivity issues and assist with network-related problems.
- Maintain documentation relating to technical issues, troubleshooting procedures and IT equipment.
- Identify technical problems and work through possible solutions to minimise disruption to teaching and learning.

Da Silva Academy Primary School — Website

Website Designer & Developer

- Updated and redesigned the school's website to improve its visual presentation and user experience.
- Worked on page layouts, content organisation and responsive presentation.
- Applied practical web design and development skills to maintain and improve a real-world organisational website.

Professional Skills

- Strong technical problem-solving and logical thinking
- Analytical approach to identifying and resolving technical issues
- Ability to develop, test and troubleshoot solutions
- Strong attention to detail
- Ability to learn new technologies independently
- Adaptable and comfortable working with new tools and technologies
- Clear communication with technical and non-technical users
- Ability to work independently and collaboratively
- Strong organisation and time management
- Ability to prioritise and manage multiple tasks

CODING, ROBOTICS & EDUCATIONAL TECHNOLOGY

- Designed and developed a Coding & Robotics curriculum from the ground up, creating structured learning content and practical activities.
- Implemented the curriculum across Grade R to Grade 7, adapting content to different age groups and ability levels.
- Worked with programming and educational technology platforms including Scratch, ScratchJr, MakeCode, EdScratch, EdBlocks and micro:bit.
- Developed practical experience with programming, algorithms, debugging, computational thinking and logical problem-solving.
- Worked with robotics equipment, microcontrollers, sensors and other technology components.
- Troubleshoot hardware, software and programming issues during practical projects and activities.

Education

January 2024 – December 2026

BSC in Information Technology
Richfield College
